Dear Isaac,

My name is Mike Hill. I run a small creative agency in Melbourne, Australia called Moonshine.

I saw your Clouds, Birds, Moon, Venus photo on APOD this week and was deeply moved.

So moved in fact that I would like to make a one off print of the photo for my office (personal enjoyment only) given it's relevance to my company name Moonshine.

I would like to know if it would be possible to pay a small license fee enabling me to access a high resolution version of the photo to print one copy from. I can provide you with paperwork confirming that only a single print would be made for personal use only.

Congratulations on capturing one of the most evocative images I have ever come across!

I look forward to your response.

Kind regards, Mike
